

Vetkim Kimya İlaç was established in 2023 with the aim of producing bolus and supportive treatment products for animal health.

However, the foundations of our company are built on academic knowledge, field experience, and scientific studies acquired in the field of animal health since 2008. While developing our products, we thoroughly analyze the biological needs of animals and formulate long-lasting, effective solutions.

By prioritizing quality, efficiency, and efficacy in bolus technology, we support the healthy development of animals and contribute to sustainable productivity for livestock producers.

As Vetkim Kimya İlaç, we advance animal health with principles of reliability, scientific accuracy, and sustainable quality. We continue to work for healthy animals, a strong industry, and a productive future.

VK-PRO PERFORMANCE BOLUS

What is it?

VK-PRO PERFORMANCE is a nutritional supplement specially formulated to enhance cattle health, reproductive performance, and overall productivity. Its carefully selected and well-balanced combination of vitamins, minerals, and organic minerals has been meticulously designed to meet the metabolic needs of cattle. This supplement supports regularity in health and reproductive cycles while contributing to the healthy growth of young animals and the birth of healthy calves. The scientifically supported formulation of **VK-PRO PERFORMANCE** improves overall cattle health and strengthens the immune system, helping animals become more resistant to various diseases and stress factors. In addition, it offers significant benefits such as increased milk yield and support for live weight gain. When used under veterinary supervision, **VK-PRO PERFORMANCE** provides a reliable solution by fully meeting the nutritional requirements of cattle and maximizing their productivity. Beyond supporting existing feeding programs, it also contributes to overall farm efficiency, helping farmers improve operational performance.

Why Should You Use It?

Fertility and Reproductive Cycle:

VK-PRO PERFORMANCE helps prevent postpartum retained placenta in cows, increases conception rates, and shortens calving intervals, thereby supporting fertility and regular reproductive cycles in cattle.

Overall Health and Immune System Support:

Its scientifically supported combination of vitamins, minerals, and organic minerals improves overall cattle health and strengthens the immune system, making animals more resistant to various diseases and stress factors.

Increased Meat and Milk Productivity:

With benefits such as increased milk yield and support for live weight gain, VK-PRO PERFORMANCE enhances overall productivity in cattle, helping maximize farm efficiency.

Coat and Skin Health:

Thanks to its carefully selected ingredients, VK-PRO PERFORMANCE supports skin health, improving coat condition and enhancing shine and vitality.

VK-PRO PERFORMANCE What Is Its Effect?

VK-PRO PERFORMANCE It is a long-acting bolus with a controlled and balanced release profile. The maximum release duration of this bolus is 120 days, during which the active ingredients are released into the body slowly and consistently.

From a development perspective, research and innovations in the formulation and release mechanisms of this type of bolus enable more precise control of the effect and allow for longer-lasting efficacy. In addition, studies on the interaction of the active substances with metabolic processes in the body can further enhance the effectiveness of the **VK-PRO PERFORMANCE** bolus.

VK-PRO PERFORMANCE

When Should It Be Used?

For Fattening Cattle: Animals under 300 kg: 1 bolus is recommended.

Animals over 300 kg: 2 boluses are recommended.

For Dairy Cows: Animals over 400 kg: 2 boluses are recommended.

For Heifers: 8–10 weeks before calving, 1 bolus is recommended.

For Dry Cows: At the time of drying off, 1 bolus is recommended.

V K - P R O PERFORMANCE

CALF BOLUS

What is it?

VK-PRO PERFORMANCE CALF, is a nutritional supplement specially formulated to support the healthy growth and development of calves. Its specialized composition, enriched with vitamins, minerals, and organic minerals, provides long-lasting and balanced nutritional support.

Why Should You Use It?

Support of Skeletal Structure and Growth:

Helps promote a strong skeletal structure and overall growth, supporting the healthy development of calves.

Improved Feed Utilization:

Helps calves benefit more efficiently from the feed they consume, allowing better utilization of nutrients. Prevention of Loss of Appetite and Growth

Retardation:

Supports healthy growth by helping prevent issues such as loss of appetite and growth retardation.

Increased Resistance to Diseases and Stress

Factors:

Helps calves become more resistant to diseases and various stress factors.

Support for Mammary Gland and Reproductive

Organ Development:

Supports the healthy development of mammary glands and reproductive organs.

Prevention of Vitamin and Mineral Deficiencies:

Helps prevent vitamin and mineral deficiencies, ensuring balanced and healthy nutrition.

Prevention of Foreign Body Ingestion (Pica):

Helps prevent pica, a condition characterized by the ingestion of foreign materials.

Support of Rumen Development:

Promotes rumen development, supporting overall digestive system health.

VK-PRO PERFORMANCE CALF What Is Its Effect?

VK-PRO PERFORMANCE CALF, is a specialized nutritional bolus designed to deliver long-lasting and balanced effects in the body. This bolus has a maximum release duration of 120 days, during which its active ingredients are released slowly and consistently.

From a development perspective, research and innovations in the formulation and release mechanisms of this nutritional bolus allow for more precise control of its effects and enable long-term efficacy. In addition, studies on its interaction with metabolic processes in the body can further enhance the effectiveness of the VK-PRO PERFORMANCE CALF bolus and support healthier growth and development in calves.

VK-PRO PERFORMANCE CALF When Should It Be Used?

During growth periods.

In cases where nutritional deficiencies are observed.

When signs of loss of appetite or growth retardation are present.

Use is recommended in calves with a fully developed rumen.

For weaned calves, administration of 1 bolus is recommended.

For calves weighing over 100–150 kg, administration of 2 boluses is recommended.

VK-PRO PERFORMANCE

SHEEP BOLUS

What is it?

VK-PRO PERFORMANCE SHEEP, It is a nutritional supplement specially formulated to enhance the health, reproductive performance, and overall productivity of small ruminants. Its carefully selected and well-balanced combination of vitamins, minerals, and organic minerals has been meticulously designed to meet the metabolic needs of small ruminants. This supplement supports regularity in health and reproductive cycles while contributing to the healthy growth of young animals and the birth of healthy offspring.

The scientifically supported formulation of **VK-PRO PERFORMANCE SHEEP** improves overall animal health and strengthens the immune system, helping small ruminants become more resistant to various diseases and stress factors. In addition, it offers significant benefits such as increased milk yield and support for live weight gain. When used under veterinary supervision, **VK-PRO PERFORMANCE SHEEP** provides a reliable solution by fully meeting the nutritional requirements of small ruminants and maximizing their productivity. Beyond supporting existing feeding programs, it also contributes to overall farm efficiency, helping farmers improve operational performance.

Why Should You Use It?

Fertility and Reproductive Cycle:

VK-PRO PERFORMANCE SHEEP supports fertility and reproductive cycles in small ruminants by helping prevent postpartum retention, increasing conception rates, and shortening calving/lambing intervals.

General Health and Immune System Support:

Its scientifically supported vitamins, minerals, and organic minerals improve overall health and strengthen the immune system, helping animals become more resistant to various diseases and stress factors.

Increased Meat and Milk Productivity:

VK-PRO PERFORMANCE SHEEP enhances productivity by supporting increased milk yield and live weight gain, helping maximize farm efficiency.

Coat and Skin Health:

With its carefully selected formulation, **VK-PRO PERFORMANCE SHEEP** supports skin health and enhances coat brightness and quality.

VK-PRO PERFORMANCE SHEEP BOLUS What Is Its Effect?

VK-PRO PERFORMANCE SHEEP, It is a long-acting bolus with a balanced and controlled release profile. The maximum release duration of this bolus is 120 days, during which the active ingredients are released into the body slowly and consistently.

From a development perspective, research and innovations in the formulation and release mechanisms of this type of bolus allow for more precise control of its effects and enable longer-lasting efficacy. In addition, studies on the interaction of the active substances with metabolic processes in the body can further enhance the effectiveness of the **VK-PRO PERFORMANCE SHEEP** bolus and support healthier development in small ruminants.

VK-PRO PERFORMANCE SHEEP BOLUS When Should It Be Used?

It can be used in small ruminants.

For Fattening Small Ruminants:

Administration of 1 bolus is recommended.

For Dairy Small Ruminants:

Administration of 1 bolus is recommended.

VK- PRO
PERFORMANCE SHEEP BOLUS
**SUPPORTS DEVELOPMENT
IN YOUR HERD.**

VK•PRO CALCIUM BOLUS

What is it?

VK-PRO CALCIUM, is a mineral supplement formulated with a combination of three different calcium sources. The calcium formate, calcium acetate, and calcium sulfate in its composition dissolve rapidly in rumen fluid and are absorbed by the rumen papillae via passive transport.

VK-PRO CALCIUM is a bolus with both fast and slow release properties; the fast release meets the immediate calcium requirement, while the slow release helps maintain blood calcium levels at the desired range for an extended period. Its high Vitamin D3 content supports calcium absorption in the intestines and strengthens the immune system.

This combination not only provides protection against milk fever but also increases blood calcium levels at calving, enhances rumen activity, and offers a protective effect on the liver.

Why Should You Use It?

Milk Fever and Blood Calcium Levels:

Helps maintain blood calcium levels during milk fever. It can also be used as a preventive measure in subclinical milk fever cases, which may not show visible symptoms but can cause productivity losses.

Prevention of Waste and Effective Application:

Provides ease of administration and dissolves rapidly, allowing quick absorption into the bloodstream and increasing overall effectiveness.

Fast and Slow Release:

The fast-release component meets immediate calcium requirements, while the slow-release component maintains blood calcium levels at the desired level for an extended period.

Vitamin D3 Content:

The high level of Vitamin D3 supports calcium absorption in the intestines and helps maintain the balance between these elements.

VK-PRO CALCIUM BOLUS What Is Its Effect?

VK-PRO CALCIUM BOLUS, It is a product specially formulated to optimize calcium levels that are critical for animal health.

-With its fast-release action, it enters the bloodstream within two hours to meet immediate calcium requirements.

-With its slow-release action, it maintains blood calcium levels at the desired range for up to 72 hours.

-It is known to provide protection against milk fever and also helps reduce the risk of hypocalcemia.

-In addition, it supports the digestive system by increasing rumen activity.

VK-PRO CALCIUM BOLUS When Should It Be Used?

Immediately After Calving: 1 bolus.

If Needed (after 12 hours): 1 bolus.

In Cases of Hypocalcemia, Consult a Veterinarian:

Use should be carried out in accordance with the veterinarian's recommendations.

VK•PRO PHOSPHOR BOLUS

What is it?

VK-PRO PHOSPHOR BOLUS, is a supplementary product specially formulated to support animals and rapidly compensate for phosphorus deficiency. It stands out with its high-quality content of monosodium phosphate, dicalcium phosphate, monocalcium phosphate, and magnesium.

Why Should You Use It?

In cases of Downer Cow syndrome.

When signs of phosphorus deficiency are observed during the spring period.

To support the treatment of phosphorus and calcium deficiencies in dairy cows.

When developmental and mobility problems are observed in newborn animals.

In bone metabolism disorders and bone fractures to strengthen callus formation.

In conditions such as excessive fatigue, weakness, and post-illness debilitation.

VK-PRO PHOSPHOR BOLUS What Is Its Effect?

VK-PRO PHOSPHOR BOLUS, Thanks to its high-quality ingredients, it has the ability to rapidly increase blood phosphorus levels. Its magnesium content helps protect muscle and nerve tissues.

With these effects, it supports healthier development in animals and helps minimize health problems.

VK-PRO PHOSPHOR BOLUS When Should It Be Used?

Immediately After Calving: 1 bolus.

If Needed (after 12 hours): 1 bolus.

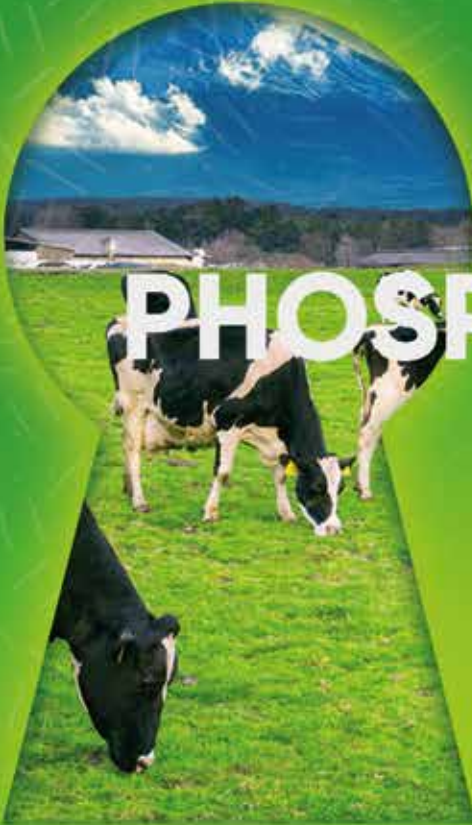

Consult a Veterinarian in Cases of Hypocalcemia:

In cases of hypophosphatemia, it is important to consult your veterinarian before using **VK-PRO PHOSPHOR**.

Use should be carried out in accordance with the veterinarian's recommendations.

VK•PRO ENERGY BOLUS

What is it?

VK-PRO ENERGY BOLUS, It is a specially developed formulation designed to increase animals' energy levels and provide protection against metabolic disorders. The different glucogenic sources in its composition are absorbed throughout the digestive system and converted into glucose, helping to balance energy levels in animals.

It provides protection especially against conditions that may occur postpartum, such as metritis, mastitis, and ketosis. This special formulation not only balances energy levels but also contains rich vitamins and minerals.

These components support animal health, strengthen the immune system, and help protect against metabolic disorders. By supporting a healthy metabolism, it helps increase productivity and improve overall health. **VK-PRO ENERGY BOLUS** is a specially formulated product developed to meet the nutritional needs of animals and support a healthy life.

Why Should You Use It?

Energy Balance and Performance Enhancement:

Sodium Propionate and Calcium Propionate help balance energy levels and optimize the digestive system in cows. This improves performance and enhances overall productivity.

Digestive System Health and Nutrient Absorption:

Rumen Yeast supports the digestive microbiota, enabling efficient digestion of nutrients and helping animals obtain maximum benefit from their feed.

Immune System and Fertility:

Vitamins A and E, together with Selenium, support the immune system through their antioxidant effects. In particular, the combination of Vitamin E and Selenium helps maintain more balanced hormone levels during the reproductive cycle, contributing to healthier reproduction and more successful pregnancies.

Metabolic Support and Protection Against Diseases:

Niacin and Cobalt support metabolic balance and provide protection against metabolic disorders, especially in cows during the postpartum period.

VK-PRO ENERGY BOLUS What Is Its Effect?

VK-PRO ENERGY BOLUS It is specially formulated to improve the health and productivity of cows and offers a wide range of benefits благодаря its rich composition.

With its fast-release action, it rapidly meets the increased energy requirements within the first 2 hours after calving. Through its slow-release mechanism, Niacin, Vitamin A, Vitamin E, Selenium, Cobalt, and live yeast are made available for metabolic use over a period of 72 hours.

VK-PRO ENERGY BOLUS When Should It Be Used?

Immediately After Calving: 1 bolus.

If Needed (after 12 hours): 1 bolus.

In Cases of Ketosis, Consult a Veterinarian:

Use should be carried out in accordance with the veterinarian's recommendations.

GREEN FIZZ

EFERVESAN TABLET

**HERBAL
ELECTROLYTE
SOLUTION
AGAINST DIARRHEA
IN CALVES**

What is it?

It is a herbal-supported electrolyte solution developed to prevent dehydration, support immunity, and accelerate recovery in calves experiencing fluid and mineral loss due to diarrhea.

Why Should You Use It?

- Rapidly restores electrolyte balance.
- Provides energy and immune support.
- Promotes natural recovery with its herbal composition.
- Supports digestion and reduces the risk of acidosis.
- Can be administered via stomach tube when necessary.

SPECIAL HERBAL BLEND

Supports the immune system.

Provides antioxidant protection.

Regulates digestion.

Accelerates cell regeneration.

Increases overall resistance.

"Safe With Vetkim"

DIRECTIONS FOR USE AND DOSAGE

- Dissolve 1 effervescent tablet in 1.5–2 liters of warm water (40–45°C) before administration.

USAGE PROGRAM

First 2 days:

- Instead of milk or milk replacer, feed with the prepared solution 2–3 times daily.

Following 2 days:

- 1–1.5 liters of the solution may be administered mixed with an equal amount of milk or milk replacer.

In cases of severe dehydration:

- It can be administered 3–4 times daily.
- If necessary, it may be administered via stomach tube.

No side effects have been observed under normal use.

BİLEŞEN GRUBU	INGREDIENT GROUP	FUNCTIONS AND BENEFITS
Elektrolitler	Sodium chloride, Potassium chloride, Sodium bicarbonate	Balances fluid loss, regulates muscle and nerve functions, and stabilizes pH.
Amino Acid	Glutamik Asit	Bağırsak hücre yenilenmesini destekler, sindirim sistemini onarır.
Carbohydrate	Lactose Monohydrate	Provides a rapid source of energy and enhances the absorption of glucose and potassium.
Vitamin	Vitamin C (Ascorbic Acid)	Supports the immune system and contributes to cell protection.
Flavoring Agent	Vanilin Butter Flavour	Improves taste, making consumption easier.
Herbal Extracts	Herbal Extract Blend	Provides antioxidant protection, supports cell regeneration, and has a soothing effect on the digestive system.
Intestinal Flora Support	Enterococcus Faecium	Maintains beneficial microflora balance, improves digestion, and provides resistance against diarrhea.

**THE CORRECT WAY TO ADMINISTER THE BOLUS IS AS FOLLOWS! USE AN APPLICATOR DURING ADMINISTRATION.
MAKE SURE THE ANIMAL HAS A NORMAL SWALLOWING REFLEX.**

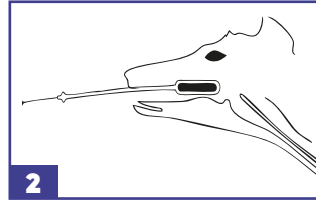

1.

Place the bolus into the applicator with the rounded end facing forward.

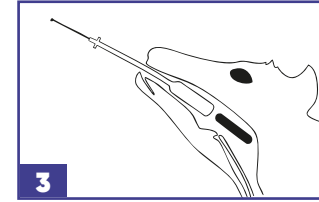

2.

2. Insert the applicator into the animal's mouth. Without blocking the animal's respiratory system, advance the applicator to the back of the tongue.

3.

3. After ensuring that you are not obstructing the trachea, release the bolus onto the back of the tongue to trigger the swallowing reflex.
